Bolt Express Expands Services

Always moving forward in the transportation industry, Bolt Express LLC continues to expand their Enterprise of Transportation Services provided. Bolt Express, already a leader in Expedite Transportation Services, now operates Bolt Express Truckload providing dedicated truckload services to all points in North America and Mexico and has also established Bolt Logistics Mexico which provides Cross Border & Intra Mexico Transportation Services, as well as consolidation, warehousing and brokerage services.

The expansion of services will allow Bolt Express to accommodate a full range of transportation requirements for their customers with mode specific diversity, geographical coverage and freight management capabilities which will bring increased value propositions to the customers supply chain distribution needs.

As a result of this expansion of business units and in order to support the new infrastructure required to service the variety of transportation services, Bolt Express just recently completed an addition to their headquarters which has more than doubled the size of their facility. The expansion includes a new state-of-the-art operations center designed to optimize the mode selection, dispatch process and shipment management efficiencies. Bolt Express and its Enterprise of Transportation Services is now positioned as a multi-functional Transportation Solutions Provider to a diverse business segment and geographically located customer base.

For more information about Bolt Express or to book a load, call 866-USE-BOLT or go online to www.bolt-express.com.
